Awareness Training for Struck by Hazards in Work Zones

STRUCK-BY FATALITIES were the leading cause of occupational deaths in FY 2002 (10/01/01-09/30/02) in all industries.

Eighty-three (30%) of occupational fatalities in the SE Region were caused by struck-by incidents.

Twenty-four (29%) of the 83 involved vehicular equipment on construction sites and highway work zones.

Fourteen (58%) of the 24 involved construction sites.

Ten (42%) of the 24 involved highway work zones.

Work Zone fatalities in the SE included: 3 – survey crews; 2 – paving; 1 – removing signs from road; 1 – traffic diversion; 1 – highway renovation; 1 – road landscaping

The Occupational Safety and Health Administration (OSHA), The Alabama Road Builders Association (ARBA), Alabama Associated General Contractors (AGC); Safe State; Alabama Department of Transportation – in a joint effort to increase awareness of hazards to road workers and educate employers and employees of requirements to comply with OSHA, the Manual on Uniform Traffic Control Devices (MUTCD), and ANSI/ISEA 107.1999, American National Standard for High Visibility Safety Apparel – have entered into an alliance to use their collective expertise in providing an awareness of the hazards, best practices, and knowledge to industry stakeholders.

Members of the Alliance are sponsoring eight classes throughout Alabama. All classes will be held from 1:30 p.m. to 4:00 p.m. There will be no costs. With the exception of the Birmingham site, all classes are at DOT facilities.

5 SEGMENTS OF TRAINING

- OSHA —Introduction
- AGC/ARBA will discuss traffic control planning
- Safe State and 3M will present the use of Personal Protective Equipment
- ALDOT will discuss traffic control
- Safe State will present “The Need for Training In and Outside the Work Zone”

RESERVATIONS ARE REQUIRED!

Phone: Charlotte Kopf at 251-344-8220, Fax: 251-342-5575, e-mail: mobagc@bellsouth.net

If you reserve a seat, please ensure an agent of your business attends so we can reach maximum attendance.
