

Machine Safety for Injection Molding Machines
taught by:
Jim Washam OSHA Region V Machine Guarding Coordinator
and
Wayne Wilson Corporate Director Safety/Training, United Southern
Industries

Presented by the SPI-OSHA Alliance
Tuesday, November 18, 2003
8:30 to 12:30 am
Mid-America OSHA Training Institute,
Sinclair Community College
Dayton, Ohio
Free of charge

You'll learn:

- The types of injuries seen in the injection molding industry;
- The causes of these injuries
- The ways that employees can protect themselves by recognizing the hazards in the job they are doing
- The requirements for guarding machines
- How to implement solutions for identified problems.

This is a train-the-trainer course. That means you'll receive an entire package of training materials, including PowerPoint presentations and other resource materials, so you can deliver the course back at your own workplace.

It's not too late to register!

Don't miss this groundbreaking course, developed jointly by SPI and OSHA to address our mutual concerns about the injuries occurring in the plastics processing industry. Please use the attached form to register.
